### **BLOODBORNE PATHOGENS**

- 1.) AIDS is spread by sexual contact, sharing needles, through infected blood and blood products and from an infected female to her unborn child.
  - a. TRUE
  - b. FALSE
  
- 2.) Hepatitis B is spread differently from AIDS
  - a. TRUE
  - b. FALSE
  
- 3.) Health care workers are at risk for exposure to:
  - a. Hepatitis B
  - b. AIDS/ HIV
  - c. Both a and b
  
- 4.) Universal Precautions apply to:
  - a. Blood
  - b. Urine
  - c. Mucous membrane
  - d. All of the above
  
- 5.) Universal Precautions do not apply to feces, nasal secretions, sputum, sweat, tears, urine, and vomit unless they contain visible blood.
  - a. TRUE
  - b. FALSE
  
- 6.) Gloves should be worn when contact with the following is expected?
  - a. Blood
  - b. Non-intact skin or open wound
  - c. Mucous membranes
  - d. All of the above
  
- 7.) The potential for splashing and soiling with blood and body substances exists in caring for certain patients. What precautions should be considered in addition to gloves?
  - a. Disposable plastic gown
  - b. Goggles
  - c. Mask
  - d. All of the above
  
- 8.) Hand-washing should be done:
  - a. Prior to patient contact
  - b. In-between patient contact
  - c. When blood or other bodily fluid comes in contact with skin
  - d. All of the above

### SAFETY TEST

1. TRUE FALSE      An electrical accident can cause nervous system damage which could cause heart fibrillation.
2. TRUE FALSE      If you have a plug with 3 prongs and the outlet only has 2 holes, remove the third prong on the plug.
3. TRUE FALSE      Electrical cords should be kept out of the way by tacking or stapling them to a stable surface.
4. TRUE FALSE      Both chronic and acute exposure to radiation can cause cancer.
5. TRUE FALSE      To protect against exposure to external radiation keep exposure time at a minimum and distance from the source at a maximum.
6. TRUE FALSE      It is not necessary to wash hands after caring for a patient who has internal radioactive material if gloves have been used.
7. TRUE FALSE      Running increases your chance of a slip and fall.
8. TRUE FALSE      If you observe unsafe conditions, do nothing, the safety committee will take care of the problem.
9. TRUE FALSE      A Hazard Communication Standard (HCS) is in place because it is an employee's need and right to know about the hazardous materials in the workplace.
10. FRUE FALSE      An MSDS should be provided for each hazardous material in the work place.

### SECURITY AND VIOLENCE PREVENTION TEST

1. TRUE FALSE      The training you receive will teach you to recognize, avoid and diffuse potentially violent situations.
2. TRUE FALSE      Some signs that a person may be losing control are observing the person acting restless, pacing, clenching or pounding fists, and/or making unrealistic demands.
3. TRUE FALSE      It is not a necessary precaution to check records for previous violent behavior.
4. TRUE FALSE      If someone is acting in a violent manner, shout above them so they can hear you.
5. TRUE FALSE      Even the most minor incident should be reported.
6. TRUE FALSE      If you answer a bomb threat phone call, you should just hang up. it is probably a prank.
7. TRUE FALSE      You should not summon security or police until a person actually becomes physically violent.
8. TRUE FALSE      Only people that exhibit warning signs will become violent.
9. TRUE FALSE      Jewelry could become a target of theft or used to strangle or cause injury.
10. TRUE FALSE      It is your responsibility to report unauthorized access to secured areas such as the nursery.

**-END OF SECURITY AND VIOLENCE PREVENTION TEST -**

### **HIPAA PRIVACY AND CONFIDENTIALITY STANDARDS FOR HEALTHCARE PROFESSIONALS SELF TEST**

1. As a healthcare professional working in a hospital, you overhear a conversation in the elevator and learn that your neighbor has arrived in the emergency room after being in a car accident. You should;
  - a. Contact the neighbor's family to alert them
  - b. Review the neighbors record to find out what happened
  - c. Do nothing
  
2. A patient requests to view his/her own protected health information (PHI). You:
  - a. Let the patient know that you will help make the appropriate arrangements for this to happen
  - b. Inform the patient that under the new HIPAA rules they are not allowed to view this information
  - c. Hand the patient the chart and leave them alone for privacy
  
3. You want to know your coworker's due date so that you can plan a baby shower for her. You access her prenatal record through the hospital computer to find out her due date so the shower will be a surprise. This action is;
  - a. A violation of HIPAA standards.
  - b. Permissible because you will inform the coworker after the surprise.
  - c. Something that the privacy officer could do.
  
4. Another provider needs a patient's health information to provide treatment. Under HIPAA regulations, you should disclose:
  - a. No information until the patient agrees
  - b. The minimum amount of information needed to provide the best quality care
  - c. The entire medical record regardless of what is included
  
5. While working in the emergency room, a child with multiple bruises and possible fractures is assigned to your care. You suspect child abuse, but the child's mother begs you not to report it. You should;
  - a. Abide by the mother's wishes since the patient is a minor
  - b. Call the police right away
  - c. Follow facility and state protocol for reporting cases of suspected abuse
  
6. Patient authorization is required to release information
  - a. When patient information is being exchanged among two or more clinicians.

Fax: (661) 309-9073

- b. When patient information is going to be shared for reasons other than for treatment, payment, or healthcare operations.
  - c. When patient information is used for billing purposes.
- 
- 7. TRUE FALSE      Part of a patient's total satisfaction regarding their care depends upon confidentiality and privacy.
  - 8. TRUE FALSE      Privacy includes protection of "physical" privacy such as during physical examinations.
  - 9. TRUE FALSE      A patient that feels secure regarding confidentiality is more likely to divulge confidential information that can help with their plan of care.
  - 10. TRUE FALSE     A patient should he coerced into signing informed consent forms if they appear apprehensive.
  - 11. TRUE FALSE     The Health Insurance Portability and Accountability Act (HIPAA) is a set of standards regarding patient confidentiality with new rules to took effect in 2003.
  - 12. TRUE FALSE     Even if a patient has been proven incompetent by a court of law, they can still give informed consent.
  - 13. TRUE FALSE     You must have a patient's prior consent before reporting rape or abuse.
  - 14. TRUE FALSE     A minor's parent must be notified if their child is pregnant.
  - 15. TRUE FALSE     If a co-worker forgets their computer password, you may give them yours.

### PATIENT RIGHTS TEST

1. TRUE FALSE      The patient Bill of Rights was developed by the American Hospital Association.
2. TRUE FALSE      The healthcare worker needs to be respectful to the patient only if the patient is respectful to them.
3. TRUE FALSE      The patient's rights may be exercised on behalf of the patient by a designated proxy.
4. TRUE FALSE      The patient does not have the right to know your name if you are a caregiver.
5. TRUE FALSE      A patient may only refuse medical treatment if a family member agrees.
6. TRUE FALSE      A patient has the right to have his/her advance directives honored to the extent of the law and hospital policy.
7. TRUE FALSE      A patient may review his/her own medical record.
8. TRUE FALSE      If the hospital offers experimental treatment or research, the patient may be selected to participate without consent.
9. TRUE FALSE      The patient has a responsibility to provide information about his/her past medical history.
10. TRUE FALSE      As a member of the health care team, you should inform patients of their rights and adhere to them when providing care.

**-END OF PATIENT RIGHTS TEST**

### AGE SPECIFIC COMPETENCY TEST

1. TRUE FALSE      A pre-school child may see their treatment or illness as a punishment.
2. TRUE FALSE      It may be necessary to repeat information to an older patient a number of times and in shorter segments.
3. TRUE FALSE      An adolescent does not care about privacy.
4. TRUE FALSE      A middle age adult is no longer interested in learning.
5. TRUE FALSE      A normal infant will triple its weight in the first year of life.
6. TRUE FALSE      Your 28 year old patient may be trying to cope with fertility issues.
7. TRUE FALSE      Two year old Samantha wants to sit on her mom's lap while having her IV started. Because of her age, you should encourage this behavior.
8. TRUE FALSE      The healthcare professional taking care of school age children should know that they are too young to worry about drugs, alcohol and sexual abuse.
9. TRUE FALSE      JCAHO requires all healthcare professionals to be trained in age specific competencies.
10. TRUE FALSE      Patient care should be modified with regards to the characteristics of age, culture, and religion.

### CULTURAL COMPETENCY TEST

1. TRUE FALSE Cultural competency is the ability to learn and use knowledge about a patient's communication method, healthcare beliefs, cultural attitudes and values.
2. TRUE FALSE Healthcare professionals must be careful not to allow their own prejudices to interfere with caring for a patient.
3. TRUE FALSE It is not necessary to recognize one's own cultural attitudes before caring for a patient of another culture.
4. TRUE FALSE The healthcare professional should become familiar with all aspects of every cultural group that they may come in contact with.
5. TRUE FALSE Healthcare professionals should always look a patient in the eye and vigorously shake their hand when introducing themselves.
6. TRUE FALSE It is best to use an interpreter who is not a member of the patient's family.
7. TRUE FALSE Patients often accept treatment for an illness based on the perceived cause of the illness.
8. TRUE FALSE Hand signals should be used with patients that speak a foreign language.
9. TRUE FALSE A patient should be encouraged to take a medication or eat certain foods that may be prohibited in his/her culture because it will familiarize the patient with the new culture here in the U.S.
10. TRUE FALSE All cultures have the same concept of death.

**-END OF CULTURAL COMPETENCY TEST -**

### RESTRAINTS AND SECLUSION TEST

1. TRUE FALSE      Once restraints and/or seclusion have been initiated, patients lose their rights.
2. TRUE FALSE      Drugs may be considered a type of restraint if used to control behavior or restrict movement and is not a standard treatment of care for the patient's condition.
3. TRUE FALSE      Restraints and/or seclusion may be used when less restrictive interventions are determined to be ineffective.
4. TRUE FALSE      In order to coerce a patient into taking a needed medication the healthcare professional may use restraint.
5. TRUE FALSE      A patient's modesty, visibility, and comfortable body temperature must be maintained while restraints and/or seclusion are in use.
6. TRUE FALSE      A new order for restraints and/or seclusion must be obtained every 2 hours for a child ages 9-17.
7. TRUE FALSE      Once a healthcare professional has received training in restraints and seclusion, it is sufficient for each facility where he/she may be employed.
8. TRUE FALSE      Restraints and seclusion may not be used simultaneously.
9. TRUE FALSE      Clinical justification for use of restraints and/or seclusion must be documented for each use.
10. TRUE FALSE      Certain hospital protocols will not require a Licensed Independent Practitioners order for restraints.

### **RECOGNIZING AND REPORTING ABUSE ACROSS THE LIFESPAN PART I CHILD ABUSE TEST**

1. TRUE FALSE      It is not always easy to discern an accidental injury from abuse because injuries are common in childhood.
2. TRUE FALSE      Head injuries are the leading cause of death in child abuse.
3. TRUE FALSE      Fractures in multiple stages of healing are not considered a classic sign of child abuse.
4. TRUE FALSE      Sexual contact, neglect or restraint are not types of child abuse.
5. TRUE FALSE      A child who is fearful of adults, afraid to speak in their presence or afraid to go home, may be sending a behavioral warning sign of abuse.
6. TRUE FALSE      There is an 87% greater risk of child abuse in single parent homes.
7. TRUE FALSE      Children are most often abused by a stranger.
8. TRUE FALSE      A parent who was a victim of abuse is more likely to be a child abuser.
9. TRUE FALSE      You must know the law for reporting child abuse in the state where you are working.
10. TRUE FALSE      As a healthcare worker, you may be the first person who can help break the cycle of abuse.

**-END OF RECOGNIZING AND REPORTING ABUSE ACROSS THE  
LIFESPAN PART I CHILD ABUSE TEST -**

### **PART II DOMESTIC VIOLENCE TEST**

1. TRUE FALSE Domestic violence occurs approximately every 15 seconds in the U.S.
2. TRUE FALSE Separated or divorced couples are at a higher risk for domestic violence.
3. TRUE FALSE Domestic violence includes all ages from the unborn to the elderly.
4. TRUE FALSE You do not need to report domestic violence, someone else will do it.
5. TRUE FALSE Bruises in multiple stages of healing would not indicate abuse.
6. TRUE FALSE A patient with a "central" injury that had not been reported for days, should arouse suspicion for domestic violence.
7. TRUE FALSE A patient whose partner is domineering, aggressive, and refuses to leave the patient alone, should he screened for domestic violence.
8. TRUE FALSE Victims of domestic violence usually do not fear retaliation.
9. TRUE FALSE You should make accusations of abuse to elicit a confession from the patient.
10. TRUE FALSE The law may require you to report abuse if suspected.

### **PART II ELDER ABUSE AND NEGLECT TEST**

1. TRUE FALSE Institutional elder abuse is inflicted by persons with a contractual obligation to provide care and protection to the elder.
2. TRUE FALSE Physical elder abuse can take place in either the domestic or the institutional setting.
3. TRUE FALSE Neglect is not a type of elder abuse.
4. TRUE FALSE Spouses that inflict abuse, may be continuing a pattern of abuse begun early in the relationship.
5. TRUE FALSE Living with a family member will always reduce an elder's risk for abuse.
6. TRUE FALSE Abuse depends on the personality of the elder, not the abuser.
- 7, TRUE FALSE Pressure sores. dehydration. poor nutrition and hygiene are all signs of neglect.
8. TRUE FALSE Most often the perpetrators of elder abuse are the elder's children or spouse.
9. TRUE FALSE Adequate staffing and burn-out are factors in abuse taking place in nursing homes.
10. TRUE FALSE Prevention is the most important factor in protecting elders against abuse.

### SEXUAL HARASSMENT TEST

1. TRUE FALSE Sexual harassment is a type of sexual discrimination.
2. TRUE FALSE Sexual harassment is prohibited by law.
3. TRUE FALSE Absenteeism and employee turnover often decrease where sexual harassment exists.
4. TRUE FALSE Two types of sexual harassment are "hostile environment" and "quid pro quo".
5. TRUE FALSE Quid pro quo means "not to be accepted".
6. TRUE FALSE Telling jokes of a sexual nature, making comments about someone's body or making sexual propositions are types of verbal harassment.
7. TRUE FALSE Two nurses are discussing the care of a patient who has undergone genital surgery. This would not be considered sexual harassment.
8. TRUE FALSE A doctor tells a nurse that he will put in a good word for her promotion as long as she accepts his sexual advances. This is "quid pro quo" harassment.
9. TRUE FALSE Avoiding sexual harassment in the workplace would include giving backrubs.
10. TRUE FALSE The facility policy and procedure regarding sexual harassment will instruct you in making a complaint if you are a victim.

### **PAIN MANAGEMENT TEST**

1. TRUE FALSE      Acute pain is a type of nociceptive pain.
2. TRUE FALSE      Neuropathic pain is a type of chronic pain.
3. TRUE FALSE      All chronic pain has an identifiable source.
4. TRUE FALSE      Not all patients have a right to assessment and management of pain.
5. TRUE FALSE      A patient's discharge planning should include pain management.
6. TRUE FALSE      Pain can be considered the fifth vital sign.
7. TRUE FALSE      The use of a pain rating scale may be useful in the assessment of pain.
8. TRUE FALSE      Prevention of pain is not a useful strategy in the management of pain.
9. TRUE FALSE      The use of opioids for acute pain poses a low risk of dependency.
10. TRUE FALSE      One type of pain management therapy should be sufficient, therefore eliminating the need for and cost of other therapies.

### CONSCIOUS SEDATION

1. Which of the following medications are used for conscious sedation:
  - a. Propofol
  - b. Ketamine
  - c. Versed
  - d. Nitrous Oxide
  
2. Conscious sedation requires supervision and monitoring. The administrator must be able to recognize and respond immediately to an adverse reaction or complication
  - a. True
  - b. False
  
3. The healthcare professional administering conscious sedation may also perform other duties during the procedure
  - a. True
  - b. False
  
4. Discharge instructions should be given:
  - a. Be given to the patient, after the procedure and right before leaving the facility to go home.
  - b. To the caregiver only
  - c. To the patient and caregiver before the procedure and administration of sedating medication
  - d. To the patient a few days before the procedure
  
5. Responsibilities of the person providing conscious sedation include:
  - a. Competence in airway management and resuscitation such as ACLS
  - b. Recognition of potential complications of each type of sedating agent used
  - c. Knowledge of cardiac arrhythmia recognition
  - d. All of the above
  
- 6 It is necessary to determine when a patient last ate or drank prior to receiving conscious sedation:
  - a. True
  - b. False

7. Prior to administration of sedating medication, the healthcare professional must confirm the right medication, right dose, right patient, right time, and right route.

- a. True
- b. False

8. Monitoring of the patient and documentation should be recorded:

- a. Every 5 minutes during the procedure.
- b. Every 15 minutes during the procedure
- c. Every 5 minutes for the first half hour, then every 20 minutes thereafter
- d. Every 10 minutes during the procedure.

9. Venous access is not important for patients receiving conscious sedation.

- a. True
- b. False

10. Children receiving Conscious sedation:

- a. Have different parameters for NPO status
- b. May feel more comfortable with a parent in the room during the procedure
- c. Need age appropriate education and instruction
- d. All of the above

**-END OF CONSCIOUS SEDATION -**

### DISCHARGE PLANNING TEST

1. TRUE FALSE Discharge planning is a multidisciplinary effort involving many different professionals.
2. TRUE FALSE Discharge planning should begin as soon as the patient expresses the desire to go home.
3. TRUE FALSE A written discharge plan should include the amount of time anticipated to discharge the patient.
4. TRUE FALSE Financial resources are not important when planning for discharge.
5. TRUE FALSE It is helpful for the healthcare professional with particular expertise to coordinate members of the healthcare team for a successful discharge plan outcome.
6. TRUE FALSE The patient's family may well be a member of the healthcare team.
7. TRUE FALSE Patients should receive teaching before discharge and written instructions to take with them.
8. TRUE FALSE Follow up for compliance is not necessary as long as the patient has written instructions to refer to.

### **ADVANCE MEDICAL DIRECTIVES TEST**

1. TRUE FALSE      If a patient has a brain injury, terminal illness or is in a coma, his/her advance directives would protect their medical rights.
2. TRUE FALSE      A Durable Power of Attorney for Health Care appoints a "proxy" to make medical decisions on your behalf in case you are unable to do so.
3. TRUE FALSE      A Living Will is made while you are alive, but goes into effect after you die.
4. TRUE FALSE      The PSDA-The Patient Self-Determination Act applies to healthcare facilities that receive federal funding.
5. TRUE FALSE      If the facility where you work receives Medicare or Medicaid, there is no need for you to discuss advanced directives with your patient.
6. TRUE FALSE      You should treat the patient differently if they have an advance directive.
7. TRUE FALSE      Laws regarding advance directives vary from state to state.
8. TRUE FALSE      Since most patients don't care about their rights, you should not discuss advance directives.
9. TRUE FALSE      I must seek a lawyer's advice when preparing or changing my advance directives.
10. TRUE FALSE      If your patient has an advance directive; they will still be able to receive pain medication.

### ORGAN AND TISSUE DONATION TEST

1. TRUE FALSE      Donated organs or tissues may be used for transplantation or research.
2. TRUE FALSE      Only nurses identify potential organ donors.
3. TRUE FALSE      You must be 18 years old to donate organs or tissue, or if a minor, you must have consent from parent(s) or guardian.
4. TRUE FALSE      A patient's health care will be different if they are an organ donor.
5. TRUE FALSE      If you are too old or have a poor medical history, you should not be a donor
6. TRUE FALSE      Being an organ donor is very expensive.
7. TRUE FALSE      You can have a normal funeral if you have donated organs or tissue.
8. TRUE FALSE      Some states designate a person as an organ donor on their driver's license.
9. TRUE FALSE      Your heir may receive money for organ donations that you make.
10. TRUE FALSE      Your facility should have a policy for you to refer to regarding organ donation.

### **MEDICATION ERRORS TEST**

1. TRUE FALSE      A medication error is a preventable event.
2. TRUE FALSE      In the event of a medication error, only the patient is affected.
3. TRUE FALSE      Administering the correct medication by the wrong route would not be an actual medication error.
- 4, TRUE FALSE      If the correct information about a drug is lacking, this could be a source for a potential medication error.
5. TRUE FALSE      Medication errors should not be reported when the healthcare professional could lose their job.
6. TRUE FALSE      A root cause analysis helps to determine what went wrong and what improvements could be made.
7. TRUE FALSE      Adequate staffing levels are investigated as part of a root cause analysis.
8. TRUE FALSE      Using a double checking system for high alert drugs is an effective way to eliminate medication errors.
9. TRUE FALSE      Unit doses are ineffective in reducing medication errors.
10. TRUE FALSE      Setting a routine of checking patient ID, allergy status, lab values and vital signs before drug administration is a good strategy to eliminate errors.

### PREVENTING MUSCULOSKELETAL DISORDERS TEST

1. TRUE FALSE      When lifting, carry the load far from your body.
2. TRUE FALSE      Using ergonomics can help prevent musculoskeletal injuries.
3. TRUE FALSE      When using a team for lifting, count out loud to synchronize movement.
4. TRUE FALSE      Using good body mechanics includes bending at the waist and using your back muscles to straighten up.
5. TRUE FALSE      For a patient transfer put the receiving surface lower to take advantage of gravity.
6. TRUE FALSE      When standing for a long time stretch frequently and use a foot stool alternating feet periodically.
7. TRUE FALSE      Pushing is preferable to pulling.
8. TRUE FALSE      Items should be stored overhead whenever possible.
9. TRUE FALSE      If you don't know how to use a lift, try to figure it out by yourself.
10. TRUE FALSE      Keeping feet apart provides a stable base and helps to maintain balance.
